

K2 Northern Europe (K2NE) is a young and dynamic company that is successfully providing the Business Process Management world with a powerful software platform built on .NET technology. The team is covering Germany, Austria, Switzerland, the Nordics, Spain, Portugal and Italy. Our largest customers include several industry leaders and major corporations, and we are growing fast.

We are looking for an enthusiastic and vibrant full-time

Technical Consultant

based in Germany

Your key duties will include:

- Being the main contact for a customer in their project.
- Performing workshops, document requirements and provide estimates for projects.
- Providing on-site consultancy to customers and partners with delivery.
- Estimating, developing, installing, testing and deploying business process automation projects.
- Interfacing with customers and partners around challenges and involving other experts and/or management as necessary.
- Producing regular and detailed progress reports to customers and management.
- Documentation of projects scope and requirements of business applications.
- Understanding and designing (.NET) extensions to the K2 platform and meet customer requirements.
- Provide product training using K2 learning materials.
- Making significant contributions to library of internal and customer-facing technical content.
- Conducting independent technical research using company supplied tools, databases, knowledge bases, etc. to find solutions to customer requirements.

Key job requirements include:

- English language fluency (speaking and writing) with a proficient level of Spanish and/or German.
- Degree in Software Engineering, Computer Science or related field.
- Must be willing to travel frequently (65%+) mainly across our regions.
- Understanding of various project methodologies as well as the software development cycle.
- Understanding of .NET (C#), SharePoint and SQL technologies.
- Ability to discuss, document and present requirements in workshops.
- A good understanding of process driven approaches and BPM in general.
- Being self-motivated as well as a team player.

Preferred skills include:

- Strong in-person and written customer communication skills.
- Ability to prioritize work assignments and adapt to department needs or business goals.
- Proven ability to negotiate project scope and deliverables.
- Project Management experience.
- Multiple years of experience within the SharePoint/Microsoft space.
- C# development skills.
- Good SQL Server development skills (T-SQL, stored procedures, database design, etc).

If you are interested in this role, please reach out to us via e-mail (k2ne-psm@k2.com) with your application in English including your earliest possible starting date and your salary expectation.
